- *Relevant UMD Coursework:* Computer Science Honors Seminar, Web Application Development with JavaScript, Algorithms, Introduction to Parallel Computing, Advanced Data Structures

EXPERIENCE

Software Development Engineer Intern, OPIS, a Dow Jones Company

June 2025 - August 2025

- Addressed technical debt across 12 projects, updating outdated NuGet packages and remediating 452 CVEs.
- Deployed updated libraries with a combined total of 66,471 downloads, preventing vulnerabilities in widely used components.
- Enhanced OPIS's web application by implementing a new feature using C# and SQL, improving search precision and user experience.
- Collaborated effectively in an Agile team environment to contribute to deliver features and resolve technical debt across projects.

CMSC335 Teaching Assistant, University of Maryland, College Park, MD

August 2024 - May 2025

- Conducted regular office hours, offering support to 20+ students weekly by helping them implement their projects and addressed questions related to the course material.
- Engaged in assessing and grading students' webpage projects and exams, leveraging skills in HTML/CSS, JavaScript, Node.js, MongoDB, and other tools by manually testing them against established criteria to ensure accurate evaluation.

Social Science Quarterly Assistant, Institute for China's Democratic Transition

December 2023 - January 2024

- Utilized Python scripts to automate the retrieval of emails from Chinese universities for a social science quarterly.
- Successfully retrieved over 10,000 emails in two weeks, organizing them into an Excel spreadsheet for the quarterly's future use in disseminating information.

PROJECTS

AI Customer Support

July 2024 - August 2024

- Created an AI-powered chatbot using Next.js, Firebase, and the OpenAI API that provided real-time customer support.
- Implemented server-side functions for user authentication, enabling users to register and log in with a unique username and password.
- Collaborated with a team of four through GitHub during the development process, contributing to the successful development and integration of key features.

Russian Roulette Discord Bot

December 2022 - January 2023

- Created an online Discord bot named "Russian Roulette Bot" using IntelliJ IDEA, Java, and the Discord API, allowing users to engage in a game of Russian Roulette on Discord.
- Deployed the bot for public use; currently active in multiple servers with consistent engagement from users.
